

Gary Prato at UNC Graduate Student Event on Chemists Working in Patent Law

9.15.23

Associate Gary Prato will be a panelist during the University of North Carolina's (UNC) Chemistry Graduate Committee for Professional Development (GCPD) virtual career panel on chemists working in patent law taking place September 15, 2023.

GCPD is a student run organization that focuses on helping chemistry graduate students and postdocs prepare for the development of a professional career. They aim to give students the tools to forge their careers, get more insight to what options students have, and grant guidance on the basic necessities any student may need to be a competitive job applicant.

To learn more about GCPD, please visit their website.
