

Jenny Colgate and Jennifer Maisel at Medmarc Webinar on AI Litigation Risks for the Medical Technology Industry

Speaking Engagement
8.29.23 | 2:00 pm ET

Partners Jenny Colgate and Jennifer Maisel will present a webinar titled "Artificial Intelligence Litigation Risks for the Medical Technology Industry" for Medmarc, the leading expert in the products liability risks facing medical technology and life sciences companies. The webinar will take place on August 29, 2023, at 2 pm ET. The event is free of charge and open to the public.

While the world is abuzz about artificial intelligence and the advances it will provide in the medical technology space, it is important to realize that along with the advances come risks—including litigation risks. There are numerous legal claims that have already started to piggyback on the growing adoption of artificial intelligence. In this hour-long talk, we will discuss the AI-related claims that are most likely to affect the medtech industry, including breach of confidentiality provisions, breach of contract, data privacy statutory violations, trade secret misappropriation, copyright infringement, unfair and deceptive trade practices, and negligence and/or products liability claims.

To view the webinar recording, or to access the webinar slides, please visit the event page on the Medmarc website.
