

Sharon Crane at Council of Scientific Society Presidents 2022 Spring Leadership Workshop

Speaking Engagement
Washington, D.C.
5.2.22

Sharon Crane will speak on "Applying AI to Drug Discovery" and understanding the patent process at the Council of Scientific Society Presidents (CSSP) 2022 Spring Leadership Workshop in Washington, D.C. on Monday, May 2, 2022. The theme of the event is Trust in Science: Role of Artificial Intelligence on Science and Quality of Life.

CSSP is a unique organization representing the breadth of science and engineering research disciplines through its member societies and federations. CSSP member societies are represented by their presidents, presidents-elect, and recent past presidents of leading scientific societies and federations whose combined membership is over one million. Founded in 1973, CSSP has served as a center for national science leadership development, a strong voice in support of science, and the premier forum for national science policy development and open, substantive exchanges on current issues encompassing the full spectrum of science, engineering, and mathematics. CSSP is committed to "Advancing Leadership in Science and Technology" and to establishing policies and programs that will ensure a bright future for 21st century science.
